

Test	Outcome	Unit	Sample	Treatment/regressor	FE / clustering	Main coefficient	Interpretation
P1 availability/thin-direct	direct route exists; WETH indirect route exists; route-cost advantage	endpoint-pair x day x trade size	V2/Sushi V2/V3 exact quoteable venues	WETH indirect-route availability/cost	endpoint-pair-day aggregation	9,584 no-direct/WETH-available rows	descriptive counterfactual, covered venues
P2 predictability	future VehicleShare	token x day	WETH, USDC, USDT, DAI, WBTC	vehicle-linked LP concentration	token/date FE robustness; date clustering	token/date FE beta 0.227; p < 0.001	predictive association, not causal feedback
P3 stress rotation	WETH-minus-stable BridgeShare	event x endpoint-pair set	top WETH downside event days	same-day WETH downside event	event-level inference	-2.96 pp, p=0.018	same-day association
P4a V3 architecture	no-direct/WETH-available indicator	endpoint-pair x month	balanced pairs around V3 launch	post-V3 indicator	pair FE; pair clustering	-25.81 pp, p < 0.001; pretrend p=0.922	route-opportunity evidence
P4b V4 settlement	intermediary ERC-20 transfer incidence	matched route unit	matched V3/V4 route cells	V4 route unit	matched-cell paired difference	-18.6 pp, p < 0.001	settlement-mechanics evidence
