

Proposition	Pre-specified main test	Main estimate	Economic unit	Status
P1	WETH availability/thin-direct-market protection	9,584 no-direct/WETH-available rows; thin-direct medians 142.65/190.21/349.28 bp	route availability and bp by trade size	main-ready, descriptive counterfactual
P2	LP concentration predicts future VehicleShare	token/date FE beta 0.227; $p \leq 0.001$	future vehicle-share association	downgrade to predictive association
P3	same-day WETH downside event decomposition	WETH -1.48 pp, stable +1.48 pp; $p=0.018$	bridge-share pp within common-support pairs	main-ready as short-window event result
P4a	V3 no-direct/WETH-available decline	-25.81 pp; $p \leq 0.001$; pretrend $p=0.922$	route-opportunity pp	usable architecture evidence, not broad launch causality
P4b	V4 intermediary transfer incidence	V4 81.4% vs V3 100%; 25-case no-transfer audit exported	ERC-20 transfer incidence	main-ready if audit examples are discussed carefully
