

Test	Unit	Sample	Outcome	Regressor / treatment	FE / SE	Baseline mean	Main estimate	Economic interpretation
P1 availability/thin-direct	endpoint-pair x day x trade size	V2/Sushi V2/V3 exact quoteable venues	route availability and WETH advantage	WETH indirect route	endpoint-pair-day aggregation	direct available 72.1%	9,584 no-direct rows; thin-direct 142.65-349.28 bp	availability and thin-direct execution protection
P2 liquidity-route dynamics	token x day	vehicle candidates	future VehicleShare; future LP concentration/log TVL	LP concentration; current VehicleShare	token/date FE; date-clustered SE	see p2_dynamic_predictability	LP-¿share 0.227 (p ¿0.001); share-¿LP conc. 0.014 (p ¿0.001); share-¿log TVL 0.060 (p 0.054)	relative persistence; absolute TVL is specification-sensitive
P3 impact stress	event x common endpoint-pair set	WETH downside event days	WETH-minus-stable BridgeShare	event-day WETH downside stress	event-level t-tests	prior 28-day common-pair baseline	-2.96 pp, p=0.018	same-day rotation away from WETH toward stable vehicles
P4a V3 opportunity	endpoint-pair x month	balanced V3 launch-window pairs	no-direct/WETH-available indicator	post-V3	pair FE; pair-clustered SE	pre/post balanced pair panel	-25.81 pp, p¿0.001; pretrend p=0.922	direct-route opportunity expansion
P4b V4 settlement	matched route unit; token x week	matched V3/V4 cells; LP panel around launch	transfer incidence; LP liquidity response	V4 route unit; post x netting exposure	matched-cell tests; token/week FE	V3 transfer incidence 100%	V4 gap -18.6 pp; log LP beta 2.132	settlement netting lowers movement and predicts LP supply response
