

Component or specification	Estimate (clustered s.e.)	Obs.
<i>Panel A. Route-count share: five-factor allocation</i>		
Pairs entering or leaving the sample	+9.8 pp	
Pairs gaining or losing a vehicle route	−0.4 pp	
Trading shifts across continuing pairs	+7.9 pp	
Change in how often continuing pairs use a vehicle	+7.0 pp	
Stablecoin share within continuing vehicle-using pairs	+1.3 pp	
Total route-count change	+25.7 pp	
<i>Panel B. Supported-value share: pair accounting</i>		
Stablecoin share within continuing pairs	0.0 pp	
Trading shifts across continuing pairs	+26.2 pp	
Weight of continuing versus year-specific pairs	−2.5 pp	
Pairs entering or leaving the sample	+19.2 pp	
Total supported-value change	+42.8 pp	
<i>Panel C. Ordered-pair $\times$ month-day $\times$ realised-scope fixed-effect regressions</i>		
All two-leg routes, count share	+0.22 (0.76)	188,520
20% agreement sample, count share	+0.32 (0.75)	182,834
20% agreement sample, supported-value share	−1.35 (2.19)	182,834
