

Vehicle leadership shifts across DeFi ultimate pairs

June 2026

Monthly route-count shares among native and stable vehicle currencies

Which currency intermediates the route?

Stablecoin route share

45.3%

+26.3 pp since January 2024

Sources of the 2024-2026 stablecoin gain

Within continuing ultimate pairs

-0.1 pp

Changing continuing ultimate-pair weights

+8.6 pp

Continuing ultimate-pair mass

-0.5 pp

Ultimate-pair entry and exit

+17.8 pp

Ultimate-pair turnover is the largest component.

Exact two-atomic-trade routes. Monthly shares use all observed ordered ultimate pairs; smaller stablecoins remain in the denominator.

The closing decomposition compares the same 181 calendar days in January-June 2024 and 2026 and is descriptive.
