

Vehicle currencies vie for frequency, value, and network reach

June 2026

Each frame is one month; no frame contains the full path

The current vehicle-currency field

Exact two-atomic-trade routes. Value shares require source, intermediary, and destination values to agree within 20%.

Named bubbles remain inside the full native-plus-stable denominator; smaller stablecoins are included in the family bars.

Current standings

	route share	value share	ultimate pairs
● WETH	54.7%	18.1%	33,044
● USDC	27.8%	38.4%	4,280
● USDT	14.4%	36.8%	2,976
● DAI	1.0%	4.4%	266
